The New Cheapside Bridge.

The Greenfield, Deerfield, and Northampton street railway have contracted with the United Construction Company of Albany, N. Y., for a steel bridge across the Deerfield at Cheapside. This is to be a three-span truss bridge, 14 feet wide in the clear, with plate girder span approaches on each side. It will be located between the highway and the railroad bridges. Strips of land for the approaches have been secured from Robert Abercrombie and Myra J. Waite. An agreement has also been made with the same company for a small bridge at Hatfield There will be regret on the part of many that the negotiations for a joint highway and railway bridge across the Deerfield came to a standstill.
